About us

In the Legendary region of Nemea, our family first started cultivating vineyards in 1876. Nemea's unique soil and climatic conditions, combined with our growing knowledge and experience in viticulture, formed the basis upon which our family business has developed ever since. Investing in the excellent quality and hygiene of our products as well as in the complete satisfaction of the people who will try (taste) them.

In 2013 the 4th generation of the family and more specifically Giorgos Mazos created Golden Black and began production of Organic Corinthian raisins from our vineyards, naturally dried in the shade and at we named it, properly and rightly "Golden Black". meaning Black Gold in order to highlight the significance of the product.

In 2017, Leonfinefoods was established with its headquarters in Ancient Nemea, Corinthia, and in essence it was created as the need for the development of the individual business "Golden Black".

The purpose of the company is the further development of grape-based products with the Black Corinthian raisin as its flagship, as well as introducing this undiscovered Greek superfood to the world.

The philosophy of Leonfinefoods is to produce products of excellent quality and hygiene and to offer them to the modern consumer in stylish and ergonomic packaging, always with the best possible value for money in mind.

Through our products we want our consumers to experience the quintessence of the senses.

Premium & Shade-dried Black Corinthian Raisins

Our leading product - the Corinthian superfood - undergoes a traditional drying procedure in the shade, where grapes take their time to dry. The slower drying process is essential for maintaining the qualities and characteristics that already exist within the grape and extending the longevity of the raisins. Our multi-awarded Premium Black Corinthian Raisins combines exquisite taste and high nutritional value, necessary in our daily diets.

Premium & Unheated Pure Grape Syrup

Our organic unheated grape syrup is consisted of concentrated 100% Black Muscat grape must, of our own vineyards. Right after the grapes are harvested, the process of concentration in vacuum space at low temperatures begins. The result is this wonderful grape syrup with fruity aromas and a delicate flavor and aftertaste.

It is a natural source of nutrients and rich in energy, iron, calcium, vitamins, antioxidants .

Sultana Raisins

SUN-DRIED

Sultana variety made its appearance in Corinth in 1922 and thrived over its climate and landscape. Long dry summers provide time to the vines to bud, flower, ripen and dry, while mild wet winters prevent them from withering, delivering one of the finest quality, Sultana raisins.
